

YOUR ONLINE PRIVACY

Covid-19 Cyber Updates

What is new?

Chances are you are **communicating online much more**

Unlike face to face or phone calls, online communication has **“built-in” recording**

People may ask you to share personal information under false pretence

What does it mean for me?

What you say or write might well be documented

Not all requests are legitimate

You should hone your privacy skills

Privacy in online communication

- Most online tools that allow recording would also show you a notification.
Look for the red dot
- **Ask if the call is being recorded**
 - Better ask than regret

Privacy with online forms

- Covid-19 is used in many online scams aimed at gaining your personal information
- Beware of any suggestion to “check”, “verify”, or “claim” your money, rights or other.

Remember –

**WHEN GOING
ONLINE, YOU ARE
NEVER ALONE**
