

The background of the slide is a futuristic digital interface. A hand is shown interacting with a screen that displays various data visualizations, including a pie chart, a globe, and a progress bar. The interface is overlaid with a grid of binary code (0s and 1s) and glowing blue lines. A large, glowing shield icon with a keyhole in the center is prominently displayed in the middle of the screen. The overall color scheme is dominated by blue and green tones, with a dark blue diagonal overlay on the left side.

IT'S TIME TO BETTER YOUR PASSWORDS

Covid-19 cyber updates

Password

Password strength: Good

SIGN IN

Choose a strong password

A strong password follows two main rules

1. It is at least 8 characters long
2. It is easy to memorize yet difficult to guess

Using passphrases would make your passwords memorable and strong (examples – “Blue Apricot”, “Red Banana”)

A strong password would prevent hackers from accessing your personal and financial information and is strictly in your hands

Store passwords safely

- Use password managers such as Lastpass, 1Password or others
- Do not share passwords with others, family or close friends included

Want to test yourself?

1. Browse to:
<https://howsecureismypassword.net/>
2. Make up a couple of passwords (not in use by you)
3. Use the password strength feedback to improve your password selection skills

Remember

A password is **your** tool for controlling who has access.
